

CERTIFICATE OF ANALYSIS

*Leishmania infantum*

FA Positive Control

Catalog No.:	PC-IFA-LSH
Lot:	P200319-001
Expiration:	06 March 2032

**Quality Control Method:** Indirect FA using *Leishmania infantum* 12-well slide (catalog no. SLD-IFA-LSH), negative control (catalog no. NC-IFA-LSH), and anti-canine IgG affinity purified FITC conjugate (catalog no. CJ-F-CANG-AP-10ML).

**Specific Reaction:** 2–4+ signal with the control at neat. No background. Endpoint dilution is greater than 1/16.

**Other Comments:** NA

**QC Manager:** 

David Hyatt

**Pattern Of Fluorescence:** Diffuse membranous fluorescence of organisms varying in shape from globus to trypanosome-like, some with clearly defined flagella. Single organisms and large clumps. High titer test sera will fluoresce brighter than this positive control serum.
