

### **CERTIFICATE OF ANALYSIS**

G2

#### Monoclonal Antibody

| Catalog No.: | G2                          |
|--------------|-----------------------------|
| Lot:         | P140205-002                 |
| Isotype:     | lgG₁                        |
| Expiration:  | 1 year when stored at 2-7°C |

# Specificity:

Bovine Herpesvirus Type 1 (BHV-1/IBR) MAb Ascites gC-gIII IgG<sub>1</sub> Isotype. [Reacts at a different epitope than monoclonal antibody F2] Also reacts with Bovine Herpesvirus Type 5.

## **Known Applications:**

ELISA, virus neutralization.

## Description:

This monoclonal antibody is produced as mouse ascites fluid, clarified by centrifugation, and filtered through a 0.2  $\mu$ m filter. The antibody concentration is 1.0 mg/ml, in phosphate-buffered saline (PBS), stabilized with 4 mg/ml bovine serum albumin (BSA), and preserved with 0.09% sodium azide (NaN<sub>3</sub>).

# Quality Control Method:

Indirect FA using BHV-1/IBR 12-well slide (catalog no. SLD-IFA-IBR), isotype control IgG₁, and anti-murine IgG FITC conjugate (catalog no. CJ-F-MURG-AP-1ML or 10ML). Mouse Immunoglobulins IgG₁ RID kit.

Specific Reaction: 2-4+ fluorescence at 10 µg/ml with an endpoint concentration of less than 0.01

μg/ml. The isotype control was negative with no background. The RID test

G2 MoAb P140205-002 at 10µg/mL 400X

results showed a concentration of 0.993 mg/ml.

Other Comments: NA

## Pattern Of Fluorescence:

Primarily undifferentiated cytoplasmic with some nuclear fluorescence, especially in rounded cells and degenerating cells in plaques with acellular centers.

#### Storage:

This monoclonal antibody is provided in liquid from and should be stored at 2-7°C. DO NOT FREEZE!
